SYNOPSIS OF COAL MINING REGULATIONS

Coal mining rights in the Dominion of Manitoba, Saskatchewan, Alberta, the Yukon Territory, the North West Territories and British Columbia, may be leased for a term of twenty years, but in the annual rental of \$1 per acre, more than 250 acres will be leased to one applicant.

Application for a lease must be made to the Agent or Sub-Agent of the district in which the rights apply for any situation.

In approved territory the land must be divided by legal subdivisions of sections, and in unapproved territory the land must be divided by natural boundaries.

Early application must be accompanied by a fee of \$5, which will be refunded if the rights applied for are not available but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

Every Lessee of coal mining rights which are not being operated shall furnish the district Agent or Sub-Agent with a sworn statement that the output of the mine is not more than that which is stated in the lease.

The lease will include the coal mining rights only, and the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$100 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of the Dominion Lands.

W. W. CORP.
Deputy Minister of the Interior.

SYNOPSIS OF CANADIAN NORTH-WEST HOMESTEAD REGULATIONS

Any unimproved section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 1 and 26, not covered, may be homesteaded by any person who is the head of a family or has made over 16 years of age, the extent of one-quarter section of 160 acres, more or less.

Early entry may be made personally at the local land office for the district in which the land is situated.

The homesteader is required to perform the conditions prescribed therein under one of the following methods:

(1) If the settler has no permanent residence, he must farm the land by him in the winter months, and the homesteader must be a Canadian citizen or a person who has been naturalized.

The homesteader is required to be given to the Commissioner of the Dominion Lands at Ottawa of intention to apply for patent.

W. W. CORP.
Deputy Minister of the Interior.

IS MONSTROUS GERRYMANDER

OVER 150 MILES OF MOUNTAINS MADE ONE ELECTORAL RIDING.

FROM PASS TO BANFF

Strange Piece of Stupidity on Part of Legislature Passing Redistributing Bill—Heard by People—Some of the Complications Involved.

The first legislature of Alberta adjourned last Thursday and it was a good job for, judging by its action in the last moments of the session, had inaugurated another week the coal mining communities of the province might all have been ordered deported to the North Pole. In its dying struggles, the legislature passed the redistribution bill and by its terms a new electoral constituency is formed known as Rocky Mountain. The people who live within it and who do not subscribe to the tenets of socialism think the second word should have been left off and that it would then have been appropriately named. It is certainly rocky beyond all shadow of a doubt. It averages about twenty miles wide and over 150 miles long, extending from the south fork of the Old Man river to something over thirty miles north of Banff, taking in all the coal mining districts within that area. The constituency is designed, it is supposed, to include all the more important coal mining towns of the province. It includes the camps of Lundbreck, Passburg, Maple Leaf, Hillcrest, Bellevue, Frank, Little, Blairmore, and Coleman on the Crow's Nest line of the C. P. R. and the town of Banff and adjacent coal camps on the main line of the C. P. R. Aside from these two districts there is no other coal mining town within the constituency and probably more than 200 people all told if that many.

The news of the formation of the constituency was received in The Pass with the utmost astonishment. The people, even the socialists when the formation of the riding would seem to favor, were dumfounded and no one would believe the statements of the press dispatches until the news was confirmed over the telephone, as not even the worst enemies of the government would believe its members capable of the stupidity or infamy, which ever actuated these responsible, until such confirmation was received.

The action of the government is resented by every person in The Pass who is not allied with the socialists, regardless of party lines. The general sentiment is that it is the result of stupidity so colossal as to be unbelievable or shameless infamy and that in either case the government merits the strongest condemnation. By this action, the government has alienated many of its strongest adherents in this district who openly declare their intention of withholding their support and it is undoubtedly a body blow to those liberals who have been the active party workers in the pass. That the same sentiment is held by the people of Banff is indicated by telephone conversations held during the last day or two between citizens of Banff and The Pass.

The constituency as now constituted, begins far enough east and north of Banff to take in the Gammore and Bonhead mining camps, runs west to the boundary line between Alberta and British Columbia; then follows the boundary line south to the headwaters of the South Fork of the Old Man river. From that point the line follows down the river to its intersection with the east line of section 29, Tp. 6, R. 2. From there it runs north two miles, then east four miles to the east line of 7-3-10, runs north three miles just taking in Lundbreck and at the northeast corner of 7-3, turns and runs west along the northern line of 7-3 to the northeast corner of 7-3-3, thus taking in all the coal mining section of the foothills and The Pass. From the northeast corner of 7-3 the line runs straight north 24 miles,

then by jogging west and north at intervals, just takes in all of the mountain country up to the place of beginning.

Thus it will be seen that this constituency of an electoral constituency is approximately 150 miles long, is about twenty five miles wide at the widest point and considerably less than that at the narrowest.

All the population of the constituency is contained in the two extreme ends. In the south within a radius of fifteen miles from Frank is a population of somewhere between 9000 and 10000. In the north within a similar radius from Banffhead is a population of perhaps 5000. For more than 100 miles between the two points there is not a total of 100 inhabitants. Probably that would just about be the figure. Perhaps another 100 live in other outlying sections.

In holding an election, one returning officer is appointed to conduct an election for all that great area. He must arrange polling precincts so that all the electors will have an opportunity to vote. Among the possible 100 inhabitants scattered over that area of 100 miles and more, there are perhaps twenty-five electors. These must be given an opportunity to vote and it will probably cost as much to arrange polling places to enable them to exercise their franchise as it will to hold the election for all the rest of the population in the riding.

In the present election, it will be beyond the possibility of human achievement to enumerate all the electors in the riding and make descriptions of all the polls in time for the election. It will have to be done after a fashion but it cannot be done with any accuracy.

RAILROAD BONDS GUARANTEED

The roads requiring guarantee are as follows:

Grand Trunk Pacific, 491 miles of branches, being a line from Wainwright to Calgary and Coats, 451 miles and a line from a point on the C. P. R. line between Calgary and Lethbridge to Macleod, 40 miles.

Canadian Northern branches, 835 miles. Line from Strathcona to Calgary to the confluence of the Little Bow and Belly rivers, and south to Lethbridge, 355 miles.

With a branch from Bittern Lake north to Vegreville, 50 miles.

Also a branch from the crossing of the Little Bow south through Macleod to the southern boundary of the province, 110 miles.

Also a branch from a point on the last mentioned branch near Macleod west to the western boundary to Coleman, 65 miles.

Also a branch from a point between Cardston and the south boundary on one of the lines mentioned west to the western boundary, 25 miles.

Line from a point on the Canadian Northern at or near Vermilion in northerly direction to near Pulford Lake district, 40 miles.

A line from a point between Morinville and north boundary of the city of Edmonton and Slave Lake railway in an easterly direction, a distance of 40 miles.

The Edmonton & Slave Lake road is the name of the Morinville extension of the C. N. R.

A line from a point at or near Convent, westerly through Red Deer, a distance of 60 miles.

A line from Calgary through Cochrane to the eastern boundary of the National park, Banff, a distance of 50 miles.

A line from Edmonton towards Peace River, 65 miles.

A line from Morinville to Athabasca landing, 65 miles.

The Alberta and Great Waterway railway from Edmonton north to Lac la Biche, and Fort McMurray, a distance of 350 miles.

SUMMARY OF LINES.

850 miles of Canadian Northern branches guaranteed at \$15,000 per mile—\$12,750,000.

491 miles of G. T. P. branches at \$13,000 per mile—\$6,393,000.

350 miles Alberta & Great Waterway company at \$12,000 per mile—\$4,200,000.

\$1,000,000 additional guarantee of \$200,000 for terminals at Edmonton.

LYON TORY CANDIDATE

NOMINATED BY CONSERVATIVES AT CONVENTION HERE YESTERDAY.

ELECTION MARCH 22nd

Alex Cameron Named Returning Officer. Withdrew Get Herby—J. A. McDonald Withdrew. Northside Will Nominate Frank Sherman Saturday.

Writs were issued for the provincial election Thursday last March 22nd is the day and nominations will be made on the 15th. The unheard of short time allowed has been the means of politicians getting busy during the week.

The conservatives led off by holding a convention at Frank yesterday afternoon. Owing to the short notice there were only thirteen delegates present from this end of the constituency and none from Banff. The convention was called and held for H. E. Lyon of Blairmore and the nomination he received at Red Deer was ratified with no opposition. In the absence of delegates from the north, the statement was made to the convention that whatever it did would be accepted by the conservatives of the Banff district.

An effort was made to defer a nomination until a joint convention of liberals and conservatives could be held to the hope of uniting the two parties on one candidate but Mr. Lyon evidently was afraid he could not carry such a convention and forced through his nomination. Subsequently a committee was appointed and the liberals were asked to confer with it. The liberals were led to understand that it was proposed to have Mr. Lyon withdraw from the nomination and that the conservatives would be held with a view to holding a convention at Frank that he would hold the nomination but when the liberals met the committee they were told that all they could expect was the privilege of enforcing the nomination of Mr. Lyon. That of course ended the conference and Mr. Lyon will run as the straight conservative candidate.

J. A. McDonald yesterday announced that he will be a candidate and Harry Matheson announced on the streets of Frank that he will hold a convention at Blairmore next week of the liberals who accept his leadership and nominate Mr. McDonald as the straight liberal candidate. Of course it will be wholly irregular and will no doubt do Mr. McDonald more harm than good as those of his liberal union friends who would support him as an independent labor candidate will resent his accepting a nomination as a liberal candidate. Also Mr. McDonald will get fewer liberal votes than as if the matter were left open and the members of the liberal party allowed to exercise their own discretion without any attempt to dictate to them at the great bulk of the party men who do not accept Mr. Matheson's captaincy and who resent having one Brown or any one else in Edmonton dictate their candidate, will show their resentment against having Mr. McDonald thrust down their throats by either staying away from the polls or silently going over to Sherman or Lyon.

The conservatives will hold their convention at Macleod Saturday when Frank Sherman will be nominated.

COAL REGULATIONS CHANGED

An Ottawa dispatch has the following relative to changes in mining regulations:

The government has decided to permit quartz mining to be carried on upon forest reserves, precautions being taken to prevent fires and destruction of timber. The regulations in regard to coal mining rights in the northwest have been changed. Heretofore such rights could only be obtained by lease, the lessee paying an advance \$1 per acre yearly. By the new regulations the applicant may have a two year lease of 2500 acres of crown lands by the payment of \$100. This is designed to encourage prospecting for coal where no known surface indications exist. The money is to be applied to rental in case of a subsequent lease.

THURSDAY, MARCH 4, 1909.

FRANK ON ALBERTA LEGISLATION

Under the item "Cost of Legislation" are included the seasonal indemnities to members of the assembly the salaries of officials, clerks, messengers, Mr. speaker and generally, all the expenses incurred in proposing, discussing and enacting provincial statutes.

In other Canadian provinces and in many states of the union, legislation is very costly, and often bad, cowardly, dishonest, controlled by lobbies, trusts and other sinister influences. In Alberta legislation has been very good and very cheap. It is largely directed by Attorney-General Crooks.

Typical of the principal Acts: The railway taxation act, land titles act, corporation taxation act, mechanics lien act, district courts act, unincorporated lands taxation act, telephone acts, railway acts, workmen's compensation act, eight hour bank to bank act, industrial schools act, etc. Not a trace of fear of corporations in the whole series, no loop holes for wealthy greed to creep through. Yet Alberta got all that good legislation for \$90,000.00 all told, up to January, 1909.

For this economy the prime credit is due to the electors themselves who chose to establish a united Alberta party assembly, and a ministry of straight men. This put legislature and ministers on their most scrupulous sense of honor, for good men always feel as when men trust them. Really, the electors voted in 1905, that they did not wish their legislature to be a sort of bear garden, a place of protracted, bad tempered, wrangling, jeering, gibing, invective and vituperation. That sort of thing consumes much time. Also wrangling-house is very expensive to the electors. It never costs less than \$25 a minute at Ottawa. It costs not far from as much at Toronto, and other affiliated provincial capitals. Alberta can't afford to pay for interminable useless, partisan gabble. It would be rank foolishness to waste money that way. Isn't that so?

Alberta will not only save a great deal but will give a valuable example to other provinces by again electing a straight united Alberta assembly to legislate, get done with it, shut up and get home, instead of wasting the peoples cash in screaming vindictive nonsense.

WANK PAPER

Nearly six million dollars of Alberta's public money have been expended straightly by her straight government up to date. About half of it went to pay for good improved and new roads, good bridges, good farms, extensive telephone service, numerous efficiently plowed fire-guards and those public buildings which are necessary to economical public service, respectable in a public sense, and particularly useful as attracting to Alberta that intelligent class of settlers who understand that commodious public buildings are a sign of decent pride and public spirit in the province.

The prime need of Alberta was for good means of communication between districts and markets. That is mainly why two and one half millions of dollars went into public works and improvements.

The Hon. W. H. Cushing ran the public works department. We all know his experience and his fitness. He is a practical man. Every cent his department expended went indirectly toward the bettering of agriculture and the farming business. Surely all Albertans can unite in wishing to keep such a man in that department.

What is the one great argument against Mr. Cushing? Why, the Calgary hoodlums call him "Old Cuck." It is positively the only thing it can be said against him—except that

he does not booze nor go around arm in arm with hoodlums. Albertans would not like him if he did. Because he is in every sense a good man who might well allude to calling him "Old Cuck" as a term of affection.

RESPECTABLE AND REPUTED.

Mr. Rutherford and his colleagues were known to be all plain, honest, upright, respectable, prosperous men long before Albertans unitedly chose them for chief public servants in 1905. They have not changed. Why should the electors change? We want such servants now, even more than three years ago.

Mr. Rutherford himself has been and is now not only our premier, but head of our department of education as well as of our treasury. In this latter office he receives all the public money. He supervises the allowances and expenditures of all other departments, those of law, public works, agriculture, charities, etc. Mr. Rutherford is responsible for the entire public outlay. He has taken care that every cent was put where it would do most good to Alberta. We all know that. Isn't that so?

Mr. Rutherford has acted on the principle and on the belief that Albertans electors unswervingly wish their public money to be laid out liberally where it will be most useful. He has acted on belief that the electors wish Alberta to keep out of debt, and yet do not wish their public money to be hoarded in banks, instead of paid out for improvements. There is that sober, steady, and increases yet more; and there is that withholdeth more than is meet, but it tendeth only to want" (Proverbs 11:24). On this scriptural principle of all sound business the public money of Alberta has been expended, profitably, since 1905.

The incident of last week in which the Canadian American company was put to heavy expense through an official action of Boiler Inspector Marshall furnishes an illustration of the injury a government official may do those over whom he has authority by yielding to a temptation to officious. It also emphasizes the wisdom of a reasonable exercise of the spirit of tolerance and elasticity in dealings between such officials and those whom they are supposed to regulate through enforcement of the law.

Mr. Marshall, last Monday, examined the boilers involved in the matter in reference. He then started in to test them but the apparatus was out of order and he therefore concluded that as the boilers looked all right he would be safe in granting a permit to operate them for a time under the pressure required by the company. Accordingly, he granted a permit to run the boilers at 100 lbs. pressure for a month. By so doing he completely justified the attitude of the company in the matter, which was that he should have issued a permit in the first place or else test immediately and not have forced the firm in hand to shut down. If he could issue the permit at one time without testing he could at another. There is no doubt that the boilers are safe and that Inspector Marshall was justified in issuing the permit. How much better it would have been then, to have employed the same elasticity in the first instance that he did in the second. He would have saved himself a lot of annoyance and the company and the men who were laid off, a nice bunch of money.

The incident may well serve as a lesson for all government inspectors of every sort in dealing with questions that require the exercise of good judgement and some give and take.

The action of the Alberta government in making a single constituency of The Pass and Banff has, at first blush, the appearance of being a piece of stupidity so monumental that its worst enemy could not believe the government capable of it. When this redistribution business was first talked we were told that riding must be divided because there were too many people for one member to represent yet they lop off a piece and then add on another containing a greater population than that taken away, while the territory in the new riding is four times as great as in the old. Then too, the population is all in the two extreme ends making it necessary for a member to travel 800 miles from which ever part of the constituency he lives in to confer with his constituents in the other end. We have not sufficient information as yet to pass final judgement but as said, at first blush the thing looks absolutely absurd and impossible.

PLAN OF REDISTRIBUTION

The redistribution bill passed by the legislature on the last day of the session, provides forty-one seats. The Pass is not made a separate riding as expected but is included with Banff and is called Rocky Mountain.

The new districts are as follows: Edmonton two seats. Calgary two seats. Lethbridge city taken out of Lethbridge district and given a separate seat.

Park, comprising east portions of Victoria and Sturgeon.

Pembina, comprising west portion of Stoney Plain.

Lac Ste. Anne, comprising west portion of St. Albert.

Alexandra, extreme eastern portion of Vermilion including Lloydminster and Wainwright.

Vegreville, extreme western portion of Vermilion.

Camrose, eastern portion of Ponoka and Wetaskiwin.

Sedgwick, comprising strip east and south of Hardisty to Red Deer river.

Stettler comprising strip east of Stettler from 18 miles north, south to Red Deer.

Olds district between Innisfail and Didsbury.

Cochrane, prairie section of old district of Banff.

Rocky Mountain takes the place of Banff, and includes as well the coal country in the Crow's Nest.

Okotoks along the Bow river south of Calgary, being a strip east and west of the town of Okotoks.

Nanton district between High River and Claresholm.

Claresholm, between Nanton and Macleod.

Constituencies as now adjusted will be as follows:

Running from north to south—

Park River, Athabasca, Sturgeon, Lac Ste. Anne, Pembina, Stoney Plain, Park, Victoria, Alexandra, Vermilion, Vegreville, Strathcona, Leduc, Wetaskiwin, Ponoka, Lacombe, Camrose, Sedgwick, Stettler, Red Deer, Innisfail, Olds, Didsbury (substituted for Rosebud), Gleichen, Cochrane, Okotoks, High River, Nanton, Claresholm, Rocky Mountain, Pincher Creek, Macleod, Cardston, Medicine Hat, Lethbridge District, Lethbridge City, Edmonton City two, and Calgary City two.
